This publication replaces the Basic Economic Data for Idaho published September 1987. This issue is a supplement to the March 1978, December 1981, and August 1986 issues, which contain all previous available data. The series has been compiled in response to the many requests for industrial employment data. It contains a historical record of Idaho's Nonagricultural Wage and Salary Employment by Industry, tabulated on statewide, county, and area levels.

We hope the publication of this information will assist private and government researchers in their tasks. A large portion of the data was gathered as a result of the day-to-day activities of the Idaho Department of Employment.

The assistance provided by Idaho's business community, Local Job Service Office managers, and the Area Labor Market analysts is greatly appreciated.
